Local Business Website Analysis

A targeted assessment of Columbus, IN businesses with websites that are actively costing them customers and revenue.

PREPARED: MARCH 5, 2026 | CONFIDENTIAL

SECTION 01

Executive Summary

We evaluated 5 established Columbus, IN businesses across auto repair, landscaping, and personal care industries. Each business shows signs of financial stability and customer demand, but their websites are failing to convert visitors into customers.

5
BUSINESSES EVALUATED

2
HIGH-PRIORITY PROSPECTS

Evaluation Scores

BUSINESS	INDUSTRY	OPPORTUNITY SCORE	VERDICT
SAK Automotive	Auto Repair	8 / 10	TOP PROSPECT
Columbus Massage Center	Spa / Salon	7 / 10	TOP PROSPECT
Hawkins Lawn & Snow	Landscaping	6 / 10	PASS - No contact info
Divine Hair Studio	Hair Salon	6 / 10	PASS - Minor fixes only
Positive Performance Auto	Auto Repair	3 / 10	PASS - Already professional

"Both top prospects are losing customers daily due to broken functionality and outdated platforms. These are not cosmetic issues -- they are revenue problems with clear, measurable solutions."

SECTION 02 — PROSPECT ANALYSIS

SAK Automotive Service & Tire

330 Center St, Columbus, IN 47201 | (812) 372-8000 | sakautomotive.com

Business Profile

- Full-service auto repair and tire shop, south side of Columbus
- Services: automotive repair, maintenance, tire rotation, installation, alignment
- Positive reviews across Yelp and Google -- described as "honest" with "fair pricing"
- Chamber of Commerce member -- established and reputable

Technical Assessment

Critical Issues

NO SSL/HTTPS | DEAD PLATFORM | NO BOOKING | NO REVIEWS SHOWN | CONTACT INFO HIDDEN | NO STRUCTURED DATA | NO OPEN GRAPH

- **Platform:** HostGator Website Builder (Webzai), November 2018. Dead-end platform with zero upgrade path -- requires complete rebuild.
- **Security:** No HTTPS. Every visitor sees "Not Secure" in their browser. Google actively penalizes this in search rankings.
- **SEO:** No structured data (Schema.org), no Open Graph tags. Meta description has a typo ("vehcile"). Sitemap references HTTP URLs.
- **Functionality:** No online booking, no reviews integration, no contact form on homepage. PayPal config still has placeholder email.
- **Mobile:** Basic responsive techniques from 2018 era. Not optimized for modern mobile-first indexing.

Revenue Impact

- **Lost search traffic:** No SSL means Google is ranking competitors higher for "auto repair Columbus IN" searches.
- **Lost appointments:** No online booking means customers searching at 9pm go to the shop that lets them book instantly.

- **Lost trust:** "Not Secure" browser warning makes visitors question the legitimacy of the business.
- **Invisible reviews:** Positive Yelp and Google reviews are not displayed on the site, removing social proof at the conversion point.

SAK Automotive: Proposed Solution

What We Would Build

PAGE / FEATURE	PURPOSE
Homepage	Hero with click-to-call, services overview, Google Reviews feed, booking CTA
Services (individual pages)	Dedicated pages per service for long-tail SEO targeting
About	Team, story, certifications -- builds trust and local connection
Reviews	Auto-pulling Google and Yelp reviews to showcase social proof
Online Booking	Integrated appointment scheduling (Calendly or custom form)
Contact	Google Maps embed, click-to-call, contact form, business hours

Technical Specifications

Included

- SSL/HTTPS (required)
- Mobile-first responsive design
- Schema.org LocalBusiness + AutoRepair structured data
- Google Analytics 4
- Open Graph + social meta tags
- XML sitemap + robots.txt
- Core Web Vitals optimized
- WCAG 2.1 AA accessibility

Project Scope

- **Type:** Full website rebuild
- **Pages:** 5-7
- **Complexity:** Small to medium
- **Integrations:** Booking, reviews, maps
- **Hosting:** Vercel or similar (fast, reliable, free tier available)
- **CMS:** Optional headless CMS for content updates

Outreach Approach

1. **Opening Hook**
   "I noticed your website shows as 'Not Secure' in every browser -- Google has been penalizing sites like this in search results since 2018. I can show you exactly where you're ranking vs. where you should be."

2. **Value Demonstration**
   Show a side-by-side comparison: their current site on a phone vs. a modern auto shop website. Point out the "Not Secure" warning, the missing booking feature, and the hidden reviews.

3. **The Ask**
   "I'd like to show you a quick mockup of what your site could look like -- no cost, no obligation. If you like it, we can talk about making it happen."

SECTION 03 — PROSPECT ANALYSIS

Columbus Massage Center & Salon

3126 17th Street, Columbus, IN 47201 | (812) 378-2880 | columbusmassagecenter.com

Business Profile

- Massage therapy, hair services, waxing, facials, and nail services
- 11+ years of online presence (since 2013)
- 252 reviews on LocalStylist -- consistent customer traffic
- Listed on TripAdvisor with active Facebook presence
- Owner: Dana Greathouse -- identifiable decision-maker

Technical Assessment

Critical Issues

BROKEN BOOKING | BROKEN GIFT CARDS | OUTDATED WORDPRESS THEME | LEGACY ANALYTICS | UNOPTIMIZED IMAGES | CLUTTERED NAVIGATION

- **Platform:** WordPress with Graphene theme (last updated Dec 2021). Heavy plugin dependencies: Jetpack, Contact Form 7, Vagaro, Slick Carousel.
- **Broken functionality:** Vagaro booking widgets display as broken placeholders. Gift card section shows placeholder text only. Testimonials reference deprecated Google Plus API.
- **Performance:** Serves unoptimized 2048px images. 15+ JavaScript dependencies. Extensive inline CSS.
- **Analytics:** Still running legacy Google Analytics (not GA4) -- will lose data tracking.
- **Navigation:** Cluttered menu structure with inconsistent hierarchy and too many top-level items.

Revenue Impact

- **Lost bookings:** The #1 conversion action on a massage center website is broken. Every visitor who tries to book online and fails either calls (best case) or goes to a competitor (worst case).

- **Lost gift card revenue:** Gift cards are pure profit drivers, especially around holidays. A broken gift card page is literally leaving money on the table.
- **Wasted investment:** This business already paid for booking integration, gift cards, and intake forms. None of them work properly. They're paying for features they can't use.
- **Eroding trust:** Broken elements make an otherwise established business look unprofessional or abandoned.

SECTION 03 — CONTINUED

Columbus Massage Center: Proposed Solution

What We Would Build

PAGE / FEATURE	PURPOSE
Homepage	Clean hero, service categories, working booking CTA, reviews feed
Massage Services	Detailed descriptions, pricing, duration, benefits for each type
Salon Services	Hair, waxing, facials, nails -- each with clear pricing
Staff / Team	Bios with photos and specialties -- builds personal connection
Gift Cards	Working e-commerce gift card purchasing (e.g., Square or Stripe)
Online Booking	Properly integrated Vagaro (or alternative like Jane App / Square Appointments)
Health Intake Form	Digital intake form replacing paper -- streamlines first visit
Contact / FAQ	Location, hours, parking info, cancellation policy, maps

Technical Specifications

Included

- Working booking integration
- Gift card e-commerce
- Digital health intake forms
- Google/Yelp reviews display
- Image optimization pipeline
- GA4 analytics (replace legacy)
- Schema.org HealthAndBeautyBusiness
- Mobile-first design

Project Scope

- **Type:** Full website rebuild
- **Pages:** 8-12
- **Complexity:** Medium
- **Integrations:** Booking, e-commerce, forms, reviews
- **Hosting:** Vercel or similar
- **CMS:** Headless CMS for service/staff updates

Outreach Approach

1. **Opening Hook**
   "I tried to book a massage on your website today and the booking system wouldn't load. I also tried to buy a gift card and that section is broken too. How long has that been an issue?"

2. **Value Demonstration**
   "You already invested in the right features -- online booking, gift cards, intake forms. The problem is they don't work. A rebuild on a modern platform would fix all of this and cost less than you might think."

3. **The Ask**
   "Would you be open to a 15-minute call where I walk you through exactly what's broken and what it would take to fix it? No charge."

SECTION 04

Recommended Next Steps

Priority-ordered actions to convert these prospects into clients.

Priority 1: SAK Automotive

1. **Call (812) 372-8000**
   Lead with the SSL/security issue -- it's concrete, verifiable, and urgent. Offer to show them their Google ranking vs. competitors.

2. **Prepare a Visual Comparison**
   Screenshot their site with the "Not Secure" warning alongside a modern auto shop website. The contrast sells itself.

3. **Offer a Free Mockup**
   Build a quick homepage mockup to show what's possible. Low effort for OphidianAI, high impact for the prospect.

Priority 2: Columbus Massage Center

1. **Call (812) 378-2880 or Visit in Person**
   Lead with the broken booking widget -- they may not even know it's down. Frame it as "I tried to use your services and couldn't."

2. **Quantify the Loss**
   Estimate: "If even 2 people per week give up on broken booking, at $80/session, that's $8,000+/year in missed revenue."

3. **Emphasize the Fix, Not the Rebuild**
   Position it as "fixing what you already paid for" rather than "starting over." This reduces perceived cost and friction.

"Both prospects have clear, demonstrable problems that any business owner can understand. The pitch is not 'your website could be better' -- it's 'your website is broken and it's costing you money right now.'"
