AI Intel

Claude Code adds Voice Mode, /loop command, and 1M context window
ANTHROPIC / RELEASEBOT
Voice mode lets you talk through code changes hands-free -- useful during client calls or brainstorming. The /loop command enables automated monitoring (e.g., deployment checks). 1M context window is now default for Max plans, directly benefiting complex multi-file workflows.

68% of developers now use AI for code generation in 2026
FIGMA / DESIGNRUSH
AI-assisted design is becoming standard. OphidianAI's edge is the full-stack AI workflow (research + design + build + deploy) -- not just AI-generated code. Position this in pitches as "AI-powered process" rather than "AI-built website."

Today's Priorities

1. **FOLLOW-UP** Columbus Massage Center and SAK Automotive follow-ups are 6 days overdue. Send follow-up emails today -- these are your two furthest-along prospects.
2. **OUTREACH** 13 cold emails staged in Gmail drafts since March 10. Review and send a batch to keep pipeline velocity up. Zero outreach sent this week.
3. **PIPELINE** Pinecone trial expires in 15 days. Evaluate whether the knowledge base justifies a paid plan or migrate before the deadline.
4. **REVENUE** Zero revenue with $55.7K in pipeline. Focus on the 3 Outreach Sent prospects -- especially Point of Hope (warm referral, follow-up due Mar 19).
