AI Intel

Claude Code Adds Native MCP Server Management

ANTHROPIC / RELEASEBOT

New /mcp dialog lets you manage servers, reconnect, and handle OAuth without leaving chat. MCP Tool Search now enables lazy loading, cutting context usage by ~95%. Directly relevant -- OphidianAI runs multiple MCP servers. This reduces token overhead and improves session stability.

AI Website Builders Accelerating Fastest Among SMBs

VEZA DIGITAL / DESIGNRUSH

Tools like Wix AI and Webflow AI are lowering the barrier for SMBs to build sites cheaply. This is both competition and opportunity -- OphidianAI's value prop needs to emphasize what AI builders can't do: custom integrations, booking systems, and hands-on strategy.

Human-Centric Design Emerging as Counter-Movement

ABSTRACT TECHNOLOGY GROUP / CRAWFORD

Growing trend toward "AI as tool, not crutch" in web design. Clients want sites that feel human-crafted. This plays to OphidianAI's strengths -- custom mockups and hands-on design differentiate from cookie-cutter AI builders.

Today's Priorities

1. **FOLLOW-UP** Columbus Massage Center and SAK Automotive follow-ups are 2 days overdue (due Mar 10). Send follow-up emails today -- $7,000 combined pipeline value at risk.
2. **PIPELINE** 13 cold emails are still staged as Gmail drafts from Mar 10. Review and send them before they go stale -- includes 11 new outreach and 2 follow-ups.
3. **OUTREACH** Nano's Car Detailing and Total Fitness are stuck in "Researching." Complete research and send outreach to keep the pipeline moving.
4. **REVENUE** Zero actualized revenue. Point of Hope Church is the warmest lead (referral, pre-proposal sent yesterday). Monitor for a reply and be ready to close.
5. **MARKETING** No social media or blog activity on record. Even one post per week builds credibility. Run /social-content to batch a week of posts.
