AI Intel

Claude Code: Memory Leak Fix, Model Overrides, Windows RTL Fix
GITHUB / ANTHROPIC
Claude Code shipped fixes for streaming memory leaks and Windows-specific bugs (RTL text, LSP URIs). New modelOverrides setting lets you map model picker entries to custom providers. Direct benefit: more stable long sessions and better Windows experience for OphidianAI's dev workflow.

AI Agencies in 2026: From Task Execution to Growth Partnerships
SEVEN FIGURE AGENCY / FORRESTER
Agencies polarizing into three tiers: task-based, efficiency-driven, and strategic growth partners. Gartner predicts 40% of enterprise apps will embed AI agents by end of 2026. Opportunity: position OphidianAI as a strategic partner (not just a website vendor) by bundling AI integrations with web builds.

Today's Priorities

1. **FOLLOW-UP** Columbus Massage Center and SAK Automotive follow-ups are 3 days overdue (due Mar 10). Send follow-up emails today -- 13 staged drafts include FU1 templates for both.
2. **OUTREACH** 13 cold emails are staged as Gmail drafts and ready to send. Review and fire them off to activate the pipeline -- these cover 11 new prospects plus 2 follow-ups.
3. **PIPELINE** Point of Hope Church (warm referral) was contacted Mar 11. Follow-up due Mar 19. No action needed today, but keep this one warm -- warm leads close at higher rates.
4. **REVENUE** Zero revenue with $149/mo burn rate. Every week without a close costs ~$37. Focus energy on the 3 prospects with outreach sent -- they are closest to converting.
5. **MARKETING** No social media or blog activity logged. Even one post per week builds visibility. Consider a quick launch post or a before/after web design showcase.
