Website Proposal for

Point of Hope Apostolic Church

Hello, Pastor Gossage

Steve Stock connected us with Point of Hope, and we're grateful for the introduction. After reviewing your current website, we've put together a plan to build a modern, mobile-friendly single-page site that reflects the spirit of your church and makes it easy for visitors to find you, learn about your services, and get connected.

This proposal outlines what we found, what we'll build, and what the investment looks like. We've also included a rough layout mockup to give you a feel for the direction -- the actual styling, colors, and design details would be discussed and refined together if you choose to move forward.

What We Found

Your current website at pointofhopechurch.com has served its purpose, but there are several issues holding it back:

- **Not mobile-responsive** -- The site does not adapt to phones or tablets. Over 60% of web traffic now comes from mobile devices.
- **Broken functionality** -- JavaScript errors (missing DD_roundies library) and mixed content warnings are degrading the user experience.
- **Outdated design** -- The layout uses image-based components from an older era of web design, making it difficult to update content.
- **Dead links** -- Several "Read More" buttons link to nowhere (#).
- **No Facebook integration** -- Despite active social media presence, there is no connection between your Facebook page and website.
- **No pastor or leadership section** -- Visitors cannot easily learn about who leads the church.

- **Limited visitor experience** -- Key information (service times, what to expect, how to find you) is scattered across multiple pages.

What We'll Build

A modern, single-page website that consolidates all essential information into one clean, scrollable experience:

- **Hero Section** -- Eye-catching introduction with your church name, tagline, service times, and clear calls to action.
- **Welcome / About** -- Your mission, vision, and core beliefs presented in a compelling, readable format.
- **Service Schedule** -- All service times (Sunday School, Worship, Bible Study, Punto de Esperanza) in an easy-to-scan layout.
- **Facebook Integration** -- Live connection to your Facebook page for events, announcements, and community updates.
- **Meet the Pastor** -- Dedicated section for Rev. Stephen Gossage with bio, photo, and contact information.
- **What to Expect** -- Visitor-focused section covering worship style, dress code, kids programs, and discipleship.
- **Ministries** -- Overview of all church ministries including youth, Sunday School, worship, and outreach.
- **Punto de Esperanza** -- Bilingual section for your Spanish-language ministry with separate contact info for Rev. Calvillo.
- **Location & Contact** -- Interactive Google Maps embed, click-to-call phone, email link, and full address.

How We Work

1. **Discovery** -- We gather your content, photos, logo, and any specific goals or preferences you have for the site.
2. **Design** -- We present a homepage mockup using your green and gold branding for review and feedback.
3. **Build** -- Full site development with mobile-responsive design, fast loading, and all agreed-upon features.
4. **Review** -- You review the site and request any revisions. We include up to 2 rounds of revisions.

5 **Launch** -- We go live, set up basic SEO, and hand off everything to you with documentation.

Timeline

Estimated delivery: **1-2 weeks** from the start of the Discovery phase. We'll keep you updated at each milestone.

Investment

ITEM	DETAILS	PRICE
Single-Page Website	Custom design, mobile-responsive, all sections listed above	$2,200
Facebook Integration	Live feed connection to church Facebook page	Included
Google Maps Embed	Interactive map with church location	Included
Basic SEO Setup	Meta tags, page titles, Google indexing	Included
Referral Discount	Referred by Steve Stock	-$500

Next Steps

1. **Reply to confirm** you'd like to move forward with this proposal.
2. **We'll send a brief content questionnaire** to gather any photos, text updates, or specific requests you have.
3. **Work begins within 2 business days** of receiving the deposit and content.

Terms & Conditions

This proposal is valid for 30 days from the date issued. Pricing is based on the scope described above; significant scope changes may require a revised quote. All original design work and code become the property of Point of Hope Apostolic Church upon final payment. OphidianAI retains the right to display the completed project in our portfolio unless otherwise agreed. Monthly maintenance is billed separately and

can be canceled with 30 days' notice. OphidianAI may request viewer-level access to Google Analytics (GA4) and Google Search Console for performance monitoring during the maintenance period.
