| 0 | 2 | 0% | N/A | N/A |

## AI Intel

### Claude Code Gets /loop Command and VS Code Session Management

RELEASEBOT / GITHUB

New /loop command runs prompts on recurring intervals -- useful for monitoring deploys or running checks during builds. VS Code now shows all Claude Code sessions in the activity bar with full markdown plan views. Opus 4.6 defaults to medium effort. Practical improvements for our daily workflow.

### Agent-Runner Frameworks Let One Dev Match a 5-Person Team

FIGMA / CODROPS / DESIGNRUSH

68% of developers now use AI for code generation. Agent-runner frameworks are enabling solo developers to manage AI agent teams with the output of 4-5 engineers. This validates OphidianAI's model -- a solo AI agency leveraging agent workflows is the right play. Worth highlighting in marketing and sales conversations.

## Today's Priorities

1. FOLLOW-UP Prepare follow-up emails for Columbus Massage Center and SAK Automotive. Calendar reminders at 6 PM -- follow-up date is tomorrow, get ahead of it today.
2. PIPELINE Complete research and send outreach to Nano's Car Detailing and Total Fitness of Columbus. Two prospects stuck in "Researching" -- move them forward.
3. REVENUE Build OphidianAI.com tonight (8 PM session). A live company website is critical for credibility when prospects check you out after receiving cold emails.
4. MARKETING Create first social media content. Zero posts to date -- any visibility is better than none. The AI agent framework trend is good content material.
5. OUTREACH Find 2-3 new prospects this week. Pipeline has only 4 prospects and 0% response rate so far -- volume matters early on.
