SAK Automotive Service & Tire

WEBSITE ASSESSMENT

THE PROBLEM

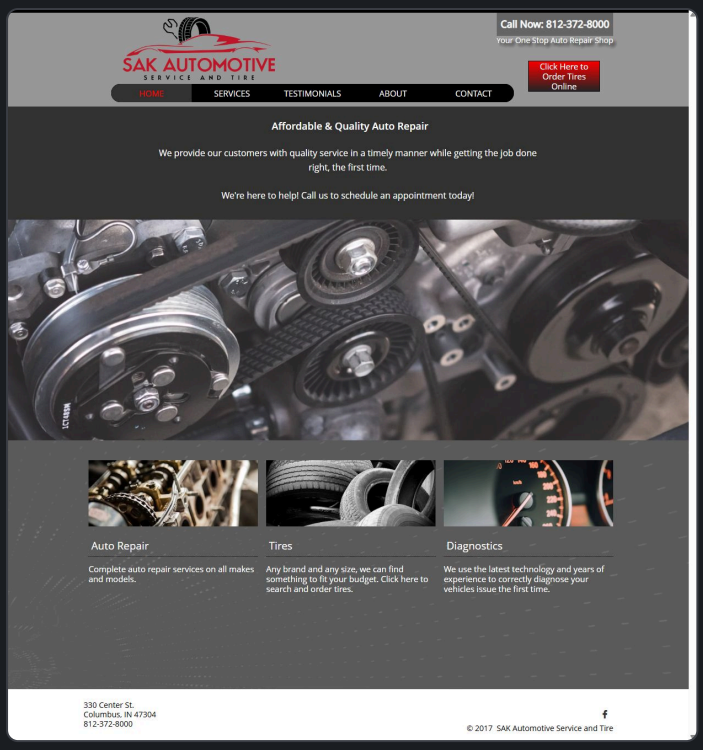
- Built on HostGator Webzai -- a dead platform with no future updates
- No SSL certificate -- browser shows "Not Secure" warning to every visitor
- No online booking or appointment scheduling
- Not mobile-optimized -- invisible to 60%+ of searchers

THE IMPACT

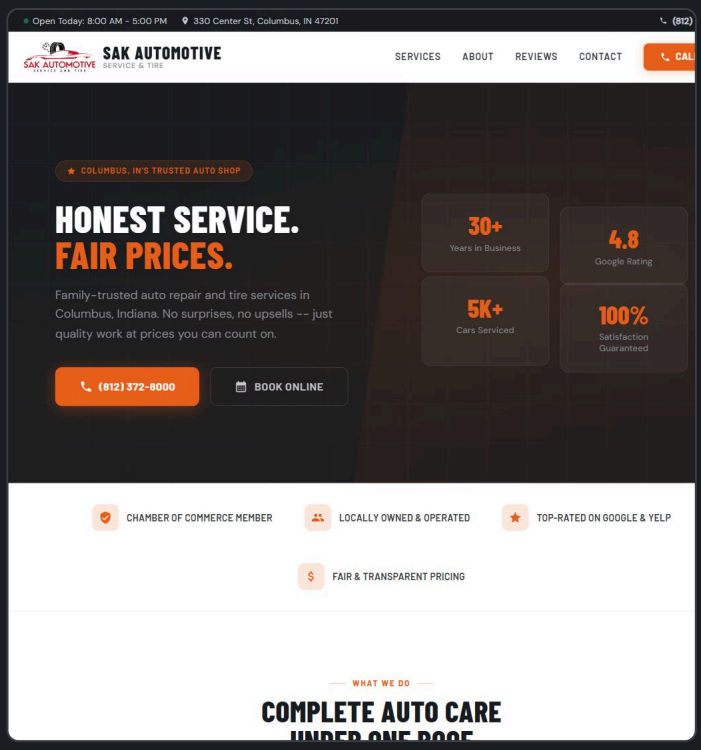
- "Not Secure" warning drives away customers who Google you after a referral
- No online booking means lost after-hours leads -- customers who want to schedule at 9pm go somewhere else
- Copyright still says 2017 -- signals a neglected business to new customers

SIDE BY SIDE

YOUR WEBSITE TODAY



WHAT IT COULD LOOK LIKE



WHAT'S INCLUDED

- Modern responsive design with click-to-call
- Online appointment booking
- SSL certificate (HTTPS) -- no more "Not Secure"
- Google Reviews integration
- SEO-optimized pages and local search visibility
