AI Intel

Claude Code Voice Mode Rolls Out
WINBUZZER / ANTHROPIC

Anthropic launched voice mode for Claude Code (hold spacebar to talk, release to send). Currently at ~5% rollout expanding through March. Could speed up your development workflow significantly -- worth enabling when available. Hands-free coding while reviewing designs or managing client calls.

40% of Web Designers Now Use AI Tools Daily
FIGMA / DESIGNRUSH / CODROPS

AI web design tools (Framer, Webflow AI, Wix AI) are mainstream but focused on templates and no-code. OphidianAI's custom-built approach with Next.js + React is a differentiator -- position against template-based AI tools by emphasizing custom design, performance, and ownership. "AI-assisted, not AI-generated" is a strong pitch angle.

Opus 4.6 Defaults to Medium Effort for Subscribers
ANTHROPIC / RELEASEBOT

The model powering Iris now defaults to a balanced speed/thoroughness mode. This means morning coffee runs and prospect research should be faster without sacrificing quality. No action needed -- just a performance improvement to be aware of.

Today's Priorities

1. **PIPELINE** Both prospects were contacted today. Monitor for replies over the next 3-4 days. Follow-ups are scheduled for March 10.
2. **REVENUE** Revenue is at $0. Focus energy on closing one of the two active prospects. Consider preparing proposals proactively so you're ready when they respond.
3. **OUTREACH** Only 2 prospects in the pipeline. Research and contact 2-3 more businesses this week to keep the funnel moving.
4. **MARKETING** No social media or blog activity yet. Even one LinkedIn post about OphidianAI's approach to web design would start building visibility.
5. **AI-INTEL** Position against AI template builders (Wix, Framer) by emphasizing custom design + code ownership. Use "AI-assisted, not AI-generated" in outreach messaging.
